26900447 **Reg.No : .....**

Name : .....

MAHATMA GANDHI UNIVERSITY, KOTTAYAM

MGU-UGP (Honours)/ MGU-BBA (Honours)/ MGU-BCA (Honours) REGULAR EXAMINATION October 2026

Fifth SEMESTER

Discipline Specific Core Course (DSC) - MG5DSCPSY300 - DYNAMICS OF RESEARCH IN PSYCHOLOGY

(2024 ADMISSION ONWARDS)

Duration: 2 hours **Maximum Marks: 70**

Remember(K), Understand(U), Apply(A), Analyse(An), Evaluate(E), Create(C), Skill(S), Interest(I) and Appreciation(Ap)

Students should attempt at least one question from each course outcome to enhance their overall outcome attainability.

Part A

Multiple Choice Questions

Answer all questions

Each question carries **1** marks

1. A researcher explains why a particular method was selected instead of another for a research problem. This explanation is primarily part of [U] / [CO1]

   a). Research method b). Research methodology

   c). Research finding d). Research objective

2. A researcher reports an unexpected finding that contradicts the original hypothesis instead of concealing it. This best demonstrates [U] / [CO1]

   a). Objectivity and honesty in reporting b). Operational definition of variables

   c). Systematic sampling d). Reliability of measurement

3. The type of which research involves manipulation of variables under controlled conditions is [U] / [CO1]

   a). Documentary research b). Correlational research

   c). Experimental research d). Non- experimental research

4. Which sequence is most appropriate? [U] / [CO2]

a). Literature review → identify gap → establish need/significance → develop research problem

b). Identify gap → collect data → literature review → develop problem

c). Data collection → literature review → identify gap → research problem

d). Conclusion → literature review → research gap → data collection

5. Quantitative research generally aims to produce [U] / [CO2]

a). Objective analytical data b). Only subjective narratives

c). Unstructured observations d). Free-form responses

6. A clearly defined research problem helps the researcher work out the [U] / [CO2]

a). Research design b). Research budget only

c). Publication format d). Reference list

7. A researcher finds that an apparent relationship between an independent variable and a dependent variable is partly influenced by another variable. The relationship is therefore said to be: [U] / [CO4]

a). Randomised b). Confounded

c). Controlled d). Operationalised

8. Which type of measurement is commonly associated with qualitative research ? [K] / [CO4]

a).Ratio measurement b).Objective measurement

c).Categorical and subjective measurement d).Experimental measurement

9. Which statement about R is correct? [A] / [CO4]

a). It can only be used for qualitative analysis

b). It is a free and open-source statistical programming environment

c). It cannot produce graphs

d). It is only used for word processing

10. In participant observation, the researcher [U] / [CO4]

a). Remains completely outside the research setting

b). Avoids interacting with participants

c). Engages in the same activities as the people being observed

d). Observes only from a distance

[1x10 = 10]

Part B

Short Essay Questions

Answer any **6** questions

Each question carries **5** marks

11. Discuss the concept of sampling error and the methods to reduce it in a research situation. [An] / [CO3]
12. Make a comparison between nominal and ordinal levels of measurement and its applications. [U] / [CO3]
13. Differentiate between probability and non-probability sampling with suitable examples. [An] / [CO3]
14. Examine the different types of variables with suitable examples. [U] / [CO3]
15. Explain exploratory research design and descriptive research design. How do their purposes differ in psychological research? [A] / [CO4]
16. "A hypothesis is important because it gives direction and specificity to a research study." Evaluate this statement. [E] / [CO4]
17. What is the need for an observation method in research? Discuss the different types of observation methods and their relevance in research. [U] / [CO4]
18. Explain fabrication, falsification and plagiarism in the context of research ethics. [An] / [CO4]

[5x6 = 30]

Part C

Essay Questions

Answer any **2** questions

Each question carries **15** marks

19. Discuss the chief steps involved in the research process. [U] / [CO1]
20. Explain the importance, sources, and methods of literature review in detail. [U] / [CO2]
21. Discuss the importance of reliability and validity of tools used for data collection. [U] / [CO4]
22. Discuss the strategies used to establish credibility and dependability in qualitative research. [E] / [CO4]

[15x2 = 30]
