FIFTH SEMESTER

Discipline Specific Core Course (DSC)

MG5DSCVCN300-BASICS OF MEDIA MANAGEMENT

Duration: 2 hours **Maximum Marks: 70**

Remember(K), Understand(U), Apply(A), Analyze (An), Evaluate(E), Create(C), Skill(S), Interest(I) and Appreciation (Ap)

Students should attempt at least one question from each course outcome to enhance their overall outcome attainability.

Part A

Short Answer Answer any **5** questions
Each question carries **2** marks

(6 x 5 = 30)

1. The telephone revolutionized communication by enabling people to exchange information instantly over long distances through voice. It laid the foundation for modern telecommunications and made personal and business communication faster and more efficient.[U] / [CO1]
2. Competitive analysis is the process of identifying and evaluating competitors' strengths, weaknesses, strategies, products, and market positions to understand competition and develop effective business strategies.[K] / [CO2]
3. Audience segmentation is the process of dividing a target audience into smaller groups based on characteristics such as age, gender, interests, location, and behaviour to develop effective communication and advertising strategies.[K] / [CO3]
4. Two examples of platform-based businesses are Amazon (e-commerce platform) and Uber (ride-hailing platform).[K] / [CO4]
5. Financial forecasting is the process of estimating a business's future income, expenses, cash flow, and financial performance based on past data and current trends.[K] / [CO5]
6. A media conglomerate is a large company that owns and operates multiple media businesses, such as television channels, newspapers, radio stations, film production houses, and digital platforms. Example: The Walt Disney Company.[U] / [CO1]
7. Media audience refers to the group of people who receive, consume, or interact with media content through platforms such as television, radio, newspapers, and digital media. [K] / [CO2]

Part B

Answer in One Paragraph Answer any **6** questions
Each question carries **5** marks

(6x5=30)

8. The event planning process involves a series of steps to organise and conduct an event successfully. It begins with setting objectives, identifying the target audience, preparing a budget, selecting the venue and date, and developing a detailed plan. It also includes arranging resources, coordinating with vendors, promoting the event, managing logistics, and ensuring proper execution. Finally, the event is evaluated to measure its success and identify areas for improvement.[U] / [CO3].
9. Partnerships are important in building entrepreneurial ecosystems because they connect entrepreneurs with investors, educational institutions, government agencies, and other businesses. They provide access to finance, knowledge, technology, skilled professionals, and market opportunities. Partnerships also encourage innovation, resource sharing, networking, and business growth. Therefore, strong partnerships help entrepreneurs overcome challenges, reduce risks, and develop successful and sustainable businesses.[E] / [CO5]
10. The media landscape continuously evolves due to technological advancements, changing audience preferences, digitalisation, and globalisation. The growth of the internet, smartphones, and social media has transformed the production, distribution, and consumption of media content. Economic factors, advertising trends, competition, government regulations, and the emergence of new business models also influence media development. Additionally, audience demand for instant, interactive, and personalised content encourages media organisations to adopt new technologies and platforms. These factors contribute to the continuous transformation of the media industry.[U] / [CO1].
11. A promotional campaign for a short film begins by setting clear objectives, such as increasing audience awareness and attracting viewers. The target audience is identified based on age, interests, and film preferences. A suitable budget and promotional schedule are prepared. Posters, trailers, teasers, and behind-the-scenes videos are created to generate interest. Social media platforms such as Instagram, YouTube, and Facebook are used to promote the film. Film screenings, collaborations with influencers, and press releases can further increase visibility. Finally, the campaign's success is evaluated by measuring views, likes, shares, audience engagement, and screening attendance.[A] / [CO2].
12. Media selection is influenced by several factors, including the target audience, advertising budget, campaign objectives, nature of the product, reach, frequency, and cost- effectiveness. The target audience's age, interests, location, and media habits help determine the most suitable platform. Television provides wide reach, newspapers offer detailed information, and social media enables interactive communication. The campaign's duration, timing, and geographical coverage also affect media selection. Therefore, choosing the right media helps organizations communicate effectively with their target audience and achieve their advertising objectives.[An] / [CO3]
13. New entrepreneurs face several barriers when starting a business. Financial constraints make it difficult to obtain capital, loans, and investments. Lack of experience and business knowledge affects decision-making and management. Market competition creates challenges in attracting customers and establishing a brand. Other barriers include limited access to technology, skilled employees, and business networks. Government regulations, legal procedures, and economic uncertainty can also delay business growth. These barriers can be overcome through proper planning, financial management, training, innovation, and effective networking.[An] / [CO4].

14. Media budgeting can be applied by allocating funds to different media platforms according to the campaign objectives, target audience, and available resources. First, the total advertising budget is determined. Then, funds are distributed among television, radio, newspapers, and digital media based on their reach, cost, and effectiveness. Expenses for content creation, production, and promotion are also considered. Finally, the campaign's performance is monitored to ensure effective use of funds and achieve maximum results within the budget. [A] / [CO2].
15. Human resources are essential in media organizations because they manage employees and ensure the smooth functioning of operations. They are responsible for recruiting skilled professionals, providing training, evaluating performance, and maintaining employee relations. Human resources help journalists, editors, camera operators, and other media professionals work efficiently as a team. They also handle salaries, workplace policies, and conflict resolution. Effective human resource management improves productivity, creativity, employee satisfaction, and the overall performance of media organizations.[U] / [CO1].

Part C (Essay)

Answer any **2** questions. Each question carries **15** marks

[15 x 2 = 30]

16. Media planning plays a vital role in advertising by determining the right media platform, target audience, timing, frequency, and budget for a campaign. It helps advertisers select suitable platforms such as television, radio, newspapers, and digital media to reach the intended audience effectively. Media planning ensures the optimum use of the advertising budget, increases audience reach, improves brand awareness, and avoids unnecessary expenditure. It also helps evaluate campaign performance and achieve marketing objectives through effective communication. [U] / [CO2].
17. OTT platforms, artificial intelligence (AI), virtual production, and immersive media have significantly transformed film production and distribution. OTT platforms such as Netflix and Amazon Prime Video enable filmmakers to distribute films directly to audiences worldwide. Artificial intelligence helps in script analysis, editing, visual effects, dubbing, and audience analysis, reducing time and production costs. Virtual production uses technologies such as LED screens and real-time computer graphics to create realistic backgrounds and environments. Immersive media, including virtual reality (VR) and augmented reality (AR), provides interactive and engaging cinematic experiences. These technologies improve creativity, reduce certain production expenses, expand global reach, and create new opportunities for filmmakers.[A] / [CO3].
18. Social media marketing helps start-ups build brand awareness, attract customers, and establish a strong market presence. Platforms such as Instagram, Facebook, YouTube, and LinkedIn enable start-ups to promote their products and services at a relatively low cost. Creating engaging content, including videos, posters, and customer testimonials, helps attract the target audience. Audience targeting allows businesses to reach potential customers based on their interests, age, and location. Influencer collaborations and customer feedback improve brand credibility, while regular interaction builds customer relationships and loyalty. Finally, analysing engagement, reach, and conversions helps start-ups evaluate campaign performance and improve their marketing strategies.[An] / [CO5]

19. The main objectives of event marketing are to create brand awareness, promote products and services, attract potential customers, and increase sales. It also aims to build customer relationships, engage the target audience, generate leads, strengthen brand image, and improve customer loyalty. Events provide opportunities for direct interaction, product demonstrations, networking, and collecting audience feedback.The main objectives of event marketing are to:Create brand awareness,Promote products and services,Attract potential customers,Increase sales and revenue,Build customer relationships,Engage the target audience,Generate leads.[U] / [CO3]
