MAHATMA GANDHI UNIVERSITY, KOTTAYAM

MGU-UGP (Honours)/ MGU-BBA (Honours)/ MGU-BCA (Honours) REGULAR EXAMINATION October 2026

Fifth SEMESTER

Discipline Specific Core Course (DSC) - MG5DSCZGY300, MG5DSCZIM300 - ANIMAL DIVERSITY CHORDATA - II

(2024 ADMISSION ONWARDS)

Duration: 1 hour 30 minutes **Maximum Marks: 50**

Remember(K), Understand(U), Apply(A), Analyse(An), Evaluate(E), Create(C), Skill(S), Interest(I) and Appreciation(Ap)

Students should attempt at least one question from each course outcome to enhance their overall outcome attainability.

Part A

MCQ

Answer all questions

Each question carries **1** marks

1. Which of the following is an endemic bird of the Western Ghats? [K] / [CO3]

   a). Malabar Grey Hornbill b). Jungle crow

   c). Peacock d). Indian flycatcher

2. Which feature supports the high survival rate of Eutherians? [U] / [CO1]

   a). External fertilization b). Placental nourishment

   c). Lack of parental care d). Cold-blooded nature

3. The fusion of the radius and ulna in Frog is associated mainly with: [K] / [CO2]

   a). Increased flexibility b). Strengthening of the forelimb

   c). Reduction of body weight d). Formation of wings

4. Which adaptation helps birds in migratory flight? [K] / [CO3]

a). Fat reserves b). Hollow bones

c). Keeled sternum d). None

5. The three auditory ossicles of mammals are [U] / [CO1]

a). Malleus, incus and stapes

b). Malleus, columella and incus

c). Stapes, quadrate and articular

d). Incus, columella and dentary

6. Which pairs of ribs are called floating ribs? [U] / [CO2]

a). 1st & 2nd b). 2nd to 5th

c). First 3 pairs d). Last 3 pairs

7. What is the structural status of the syrinx in members of Superorder Palaeognathae? [K] / [CO1]

a). It is completely absent.

b). It is highly developed with four tympaniform rings.

c). It is modified into a toothless beak.

d). It is fused with the pygostyle.

8. The young one of kangaroo is commonly called [K] / [CO1]

a). Cub b). Calf

c). Chick d). Joey

a). Diastole b). Systole

c). Cardiac output d). Pulsation

10. The roof of the buccal cavity of Rabbit is formed by [K] / [CO2]

a). Taste buds b). Palate

c). Tonsil d). Jaws

11. What is the functional significance of the pecten found inside a bird's eye? [U] / [CO1]

a). Concerned with binocular night-vision

b). Concerned with UV Protection

c). Concerned with focusing distant objects.

d). Concerned with high power of accommodation.

12. What is the main nitrogenous waste in Rabbit? [An] / [CO2]

a). Urea b). Ammonia

c). Uric acid d). Creatinine

[1x12 = 12]

Part B

Short Answer Questions

Answer any **6** questions

Each question carries **3** marks

13. Compare Delphinus and Dugongs based on adptations [U] / [CO1]

14. Describe the optic lobe in pigeons. [U] / [CO2]

15. Explain the importance of the cloaca in pigeon. [U] / [CO2]

16. List the major sense organs with present in vertebrates. [K] / [CO2]

17. Describe the main divisions of the nervous system in rabbit [U] / [CO2]

18. Give a note on the arterial system of *Euphlyctis.* [U] / [CO2]

19. Explain the function of the oviduct in birds. [U] / [CO2]

20. Name the principal bones of the forelimb of a pigeon. [K] / [CO2]

[3x6 = 18]

Part C

Short Essay Questions

Answer any **4** questions

Each question carries **5** marks

21. Outline the broad classification of Class Aves into subclasses and superorders and state any three general features of the subclass comprising extinct birds. [K] / [CO1]

22. Compare the forelimbs of Frog, Pigeon and Rabbit with respect to their functions. [An] / [CO2]
