Remember(K), Understand(U), Apply(A), Analyse(An), Evaluate(E), Create(C), Skill(S), Interest(I) and Appreciation(Ap) Students should attempt at least one question from each course outcome to enhance their overall outcome attainability.

Part A Very Short Answer Questions Answer any 5 questions Each question carries 3 marks

1. Define meta tag. [K] / [CO1]

Answer: Answer: A meta tag is an HTML element that provides information about a webpage to search engines and browsers. It helps describe the page's content and supports search engine optimization (SEO).It is placed inside the `<head>` section of an HTML document.

Title tag: Specifies the title of a webpage.**Meta description:** Provides a brief summary of the webpage.

2.Mention any three types of content marketing. [K] / [CO1]

Answer: Blog posts ,Articles,Video marketing,Infographics.

Other acceptable answers: Social media posts, podcasts, e-books, email newsletters and case studies.(Mark Distribution: Any three types – 1 mark each (3 marks))

3. Define content optimization. [K] / [CO1]

Answer: Content optimization is the process of improving website content to increase its visibility, relevance, readability and performance in search engines.

It includes using relevant keywords, proper headings, meta tags, images and quality content.

Mark Distribution: Definition – 2 marks; Techniques/examples – 1 mark.

4. Differentiate User generated content with Brand created content. [An] / [CO2]

User-Generated Content : Created by customers or users. Reflects personal experiences, opinions and reviews. Example: A customer posting a product review.

Brand-Created Content : Created by the company or brand. Communicates the brand's message and promotes products or services. Example: A company publishing a promotional advertisement.

5. Identify two categories of online review platforms and their impact on consumer decisions. [K] / [CO2]

Answer:

1. E-commerce review platforms: Amazon, Flipkart – Customer ratings and reviews help buyers evaluate product quality and make purchasing decisions.
2. Business review platforms: Google Reviews, TripAdvisor and Facebook – Reviews and ratings help consumers assess service quality, reputation and reliability.

Positive reviews build trust, negative reviews discourage purchases, and ratings help consumers compare alternatives.

Mark Distribution: Two categories – 1 mark each; Impact on consumer decisions – 1 mark.

6. What is social media listening? [U] / [CO2]

Answer: Social media listening is the process of monitoring and analyzing online conversations, comments, mentions and feedback about a brand, product or industry on social media platforms.

It helps businesses understand customer opinions, identify trends and improve customer satisfaction.(Mark Distribution: Definition – 2 marks; Uses/benefits – 1 mark.)

7. Define social media and state its role in digital marketing. [K] / [CO2]

Answer: Social media refers to online platforms that allow users to create, share and exchange information, ideas and content.Examples: Facebook, Instagram, YouTube and LinkedIn.

Role in Digital Marketing: Social media helps businesses promote products, increase brand awareness, engage customers, generate leads and drive website traffic.

Mark Distribution: Definition – 1 mark; Examples – 1 mark; Role – 1 mark.

Part B Short Answer Questions

8. Explain indexing in detail. [U] / [CO1]

Answer: Indexing is the process by which search engines analyze, organize, and store web page information to provide relevant search results.

Steps involved in indexing:

1. Crawling: Discovering web pages using bots.
2. Content Analysis: Analyzing text, images, and keywords.
3. Storage: Saving page information in the search index.
4. Tokenization: Dividing text into smaller units called tokens.
5. Duplicate Detection: Identifying duplicate pages.
6. Normalization: Converting words into a standard form.
7. Inverted Index: Mapping words to the pages containing them.
8. Search Results: Retrieving relevant indexed pages for user queries.

Example: Google analyzes a new blog post and adds it to its index if eligible.

Mark Distribution: Definition – 1 mark; any four steps with explanation – 4 marks.

9. Discuss the benefits of Off-Page SEO. [U] / [CO1]

Answer: Off-page SEO refers to optimization activities performed outside a website to improve its reputation, authority and visibility in search engines.

Benefits of Off-Page SEO:

1. Improves Search Engine Rankings:
2. Increases Website Traffic:
3. Builds Brand Awareness:
4. Improves Website Authority:
5. Enhances Online Reputation:

Example: A popular technology website linking to a company's blog may increase its referral traffic and credibility.

10. Differentiate digital marketing from traditional marketing. [U] / [CO1]

Digital Marketing :Uses websites, search engines, email and social media. Allows quick interaction through messages and comments. Targets specific audiences. Campaigns can be changed quickly at lower cost.

Traditional Marketing :Uses newspapers, TV, radio and posters. Reaches a broad audience. Measures results using surveys and audience estimates. Changes may take more time and money.

Example: Instagram advertising is digital marketing, whereas newspaper advertising is traditional marketing.(Mark Distribution: Any five valid differences – 1 mark each (5 marks).)

11. Explain the critical role of web analytics in digital marketing. [U] / [CO2]

Answer: Web analytics is the process of collecting, measuring, analyzing and reporting website data to understand user behavior and improve digital marketing performance.

Role of Web Analytics:Website Traffic Analysis, Understanding User Behavior, Conversion Tracking,Campaign Performance Measurement,Decision Making and Optimization:

Example: Google Analytics can help an online store identify which marketing channels generate the most purchases.

12. Explain why privacy, security and trust are becoming important in digital marketing. [An] / [CO2]

Answer: Privacy, security and trust are essential in digital marketing because businesses collect and process customer information through websites, applications and online transactions.

1. Protection of Personal Information: Privacy practices help prevent misuse of customer details such as names, email addresses and phone numbers.
2. Prevention of Cyber Threats: Security measures protect customers against data breaches, fraud and unauthorized access.
3. Building Customer Trust: Transparent data practices and secure transactions encourage customers to use digital services.
4. Legal Compliance: Businesses must follow applicable data protection and privacy laws.
5. Brand Reputation and Customer Loyalty:

Example: An e-commerce website using HTTPS, secure payment gateways and transparent privacy policies can increase customer confidence.

13.Write the advantage and limitations of influencer marketing for business.[An] / [CO2]

Answer: Influencer marketing is a digital marketing strategy in which businesses collaborate with social media influencers to promote products or services to their followers.

Advantages:

Increases Brand Awareness,Builds Credibility: Reaches Target Audiences:

Limitations:

High Cost: Risk of Fake Followers and Engagement, Artificial engagement can reduce campaign effectiveness.Reputation Risk: Controversial influencer behavior or misleading promotions may negatively affect the brand.

Example: A cosmetics company collaborating with a beauty influencer on Instagram to promote a new skincare product.
