Name : .....

MAHATMA GANDHI UNIVERSITY, KOTTAYAM

MGU-UGP (Honours)/ MGU-BBA (Honours)/ MGU-BCA (Honours) REGULAR EXAMINATION October 2026

Fifth SEMESTER

Discipline Specific Elective (DSE) - MG5DSEFDG302 - WORLD ART AND COSTUMES

(2024 ADMISSION ONWARDS)

Duration: 1 hour 30 minutes **Maximum Marks: 50**

Remember(K), Understand(U), Apply(A), Analyse(An), Evaluate(E), Create(C), Skill(S), Interest(I) and Appreciation(Ap)

Students should attempt at least one question from each course outcome to enhance their overall outcome attainability.

Part A

Multiple Choice Questions

Answer all questions

Each question carries **1** marks

1. Name the most common type of footwear in Ancient Egypt? [K] / [CO1]

   a). Boots b). Sandals

   c). High heels d). Shoes with laces

   ANS:b). Sandals

2. Name the basic shape of Ancient Greek garments before they were worn? [K] / [CO1]

   a). Fitted and stitched like modern clothes b). Rectangular pieces of cloth

   c). Circular pieces of cloth d). Triangular pieces of cloth

   ANS:b). Rectangular pieces of cloth

3. Find the garment known as a Shendyt? [K] / [CO1]

   a). Head covering b). Wrapped skirt-like garment

   c). Pair of trousers d). Sandal

   ANS.b). Wrapped skirt-like garment

4. What was the “palla” in roman womens dress? [K] / [CO1]

a). A type of footwear

b). A large rectangular cloak or wrap worn over the stola similar to the greek himation

c). A type of jewellery

d). A hairstyle

ANS. b). A large rectangular cloak or wrap worn over the stola similar to the greek himation

5. Byzantine jewellery commonly included: [U] / [CO2]

a). Brooch

b). Kirtle

c). Hose

d). Hennin

ANS.a). Brooch

6. Which material was particularly important in Byzantine luxury clothing? [K] / [CO2]

a). Silk

b). Denim

c). Leather

d). Jute

ANS.a). Silk

7. A characteristic feature of Gothic costume was: [U] / [CO2]

a). Horizontal appearance

b). Fitted silhouette

c). Very short garments

d). Plain surfaces only

ANS.b). Fitted silhouette

8. Which garment was worn over the upper body by Renaissance men? [K] / [CO2, CO3]

a). Doublet

b). Farthingale

c). Wimple

d). Veil

ANS.a). Doublet

9. Find the head dress used by the women. [K] / [CO3]

a). Bonnets

b). Bowler hat

c). Derby

d). Homburg hat

ANS.a). Bonnets

10. Identify the word which means, "performated metal sphere (gold or silver) containing spices and scented oils, suspended from waist girdless toward off foul odors and disease. [K] / [CO3]

a). Visards b). Pomanders

c). Pantofler d). Chopin

ANS.b). Pomanders

ANS: “vest” was the older term for a waistcoat, a key part of men’s three-piece suits. It was typically Sleeveless, buttoned down the front, Worn over a shirt and under a jacket

[1x10 = 10]

Part D

Short Answers

Answer any **5** questions

Each question carries **2** marks

31. Compare the chiton and the himation in terms of their function. [U] / [CO1]

ANS: The chiton functioned as the basic body garment, while the himation served as the outer wrap that signaled public presence, modesty, and social meaning.

- The chiton was the primary undergarment or tunic, worn directly on the body by both men and women; it provided coverage, mobility, and everyday practicality. It was typically made of light linen or wool, fastened at the shoulders, and often belted for movement.
- The himation was a rectangular outer cloak, draped over the chiton or peplos, functioning as a public-facing garment that added warmth, modesty, and social signaling. It was made of heavier wool and worn by both gende.

32. Compare the fibula and the zone in terms of their function [U] / [CO1]

ANS: The fibula fastened garments with a pin, while the zone was a belt or girdle used to bind the waist and shape clothing.

A fibula was a metal clasp functioning like a safety pin, used to fasten garments such as cloaks, tunics, mantles, and dresses.It consisted of a pin, bow, spring or hinge, and catch-plate, and could be plain or richly decorated in bronze, silver, or gold. Fibulae were essential for securing draped clothing and also served as markers of status, military identity, and regional style.

The zone was a belt or girdle, usually textile or leather, worn around the waist. It cinched tunics, adjusted garment length, and shaped the body’s silhouette. Women used the zone to define the waist; men used it to gather tunics for work or movement. Unlike the fibula, the zone did not fasten fabric layers together—it bound them.

33. Explain the characteristics of the Byzantine dalmatica. [U] / [CO2]

ANS: The Byzantine dalmatica was a long, wide-sleeved tunic made of rich fabric and decorated with stripes and patches to show status, authority, and later religious meaning.

It was a T-shaped garment, usually long, with wide sleeves, made from linen or silk, and decorated with vertical stripes (clavi) and ornamental patches (segmentae). Its richness showed rank, and it later became a church vestment.

34. Describe Gothic women's costume. [U] / [CO2]

ANS:

- **Long, simple gowns** with soft draping.
- **Chemise** (linen underdress) worn under a **cote** (main gown).
- **Surcote**: sleeveless over-garment.
- **Tight sleeves**, minimal decoration, tippets, bagpipe sleeves, bombard sleeves.
- **Silhouette**: fitted bodice, belted waist, deep pleats.
- **Fabrics**: wool, silk; fur for wealthy women.
- **Headwear**: wimples, veils, barbettes, coifs, hair nets (crespines).
- **Footwear**: pointed shoes.

35. Define any two undergarments in the Victorian Period. [U] / [CO3]

Chemise & Drawers: The innermost layer made of plain linen or cotton to protect the skin from corset friction.

Corset: Whalebone- or steel-boned undergarments that molded the torso into the fashionable narrow-waisted silhouette of the decade.

Petticoats: Heavy starched fabric layers used in the early years.

Cage Crinoline: A flexible steel-hoop frame introduced in the 1850s to hold out massive skirts without excessive weight.

Bustle: Metal, horsehair, or wired pads tied around the waist to push skirt volume exclusively to the back (1870s–1880s).

Corset Cover & Camisole: Placed over the corset to smooth out lines and hide dark boning seams under light dress fabrics.

36. What is Parasols? [K] / [CO3]

ANS: Parasols -silk or lace sun umbrellas used by the Victorian women's as an accessory.

A parasol is a handheld or fixed canopy used to block sunlight. Unlike rain umbrellas, parasols are typically made from lighter fabrics such as cotton, lace, paper, or thin synthetic materials that prioritize shade rather than waterproofing.

Part E

Long Answers

Answer any **2** questions

Each question carries **5** marks

37. Explain the Roman men's costume, including the tunica, toga and important outer garments. [U] / [CO1]

ANS: Roman men typically wore a tunica as their basic garment, a toga for formal and civic occasions, and several outer garments for warmth, travel, or military use.

Tunica

The tunica was the everyday clothing for Roman men—simple, practical, and worn by all social classes.

- Structure: A knee-length, short-sleeved garment made from two pieces of wool stitched together.
- Fit: Usually belted at the waist; wealthier men might wear longer tunics with decorative bands (*clavi*).
- Social meaning:
    - Senators wore tunics with broad purple stripes-latus clavus.
    - Equestrians wore narrow purple stripes - angustus clavus.
    - Slaves and labourers wore plain, short tunics for ease of movement.

  Underlayers: Some men wore a simple under-tunica; colder regions used heavier wool.

Toga

The **toga** was the most iconic Roman garment—large, draped, and symbolically powerful.

- **Material & size:** A semicircular wool cloth often 4–6 meters wide, requiring skill to drape.
- **Who wore it:** Only **Roman citizens**; foreigners and slaves were forbidden from wearing it.
- **Occasions:** Public ceremonies, political events, courts, festivals, and official duties.
- **Types of toga:**
    - **Toga virilis:** Plain white; worn by adult male citizens.
    - **Toga praetexta:** White with a purple border; worn by magistrates and freeborn boys.
    - **Toga candida:** Bright white, chalked; worn by political candidates.
    - **Toga pulla:** Dark-colored; worn during mourning.
    - **Toga picta:** Purple and gold; worn by victorious generals and emperors.

Important Outer Garments

Roman men used several outer garments depending on weather, travel, or social setting.

- **Pallium**
- A Greek-style rectangular cloak.
- Worn by philosophers, scholars, and later by many citizens.
- Easier to wear than the toga; became popular in late antiquity.
- **Lacerna**
- A light, often colorful cloak.
- Fastened with a clasp.
- Used for everyday wear, especially in cooler weather.
- Sometimes worn over the toga for warmth.
- **Paenula**
- A heavy, hooded cloak.
- Made of thick wool or leather.
- Used for travel and protection from rain.
- Common among soldiers and lower classes, but also used by citizens.
- **Sagum**
- A military cloak.
- Worn by soldiers and during wartime.
- Made of coarse wool; durable and warm.
- **Cucullus**
- A small hood or hooded cloak.
- Used in rural areas and by travelers

38. Explain the importance of accessories and jewellery in ancient Roman costume, with suitable examples for men and women. [U] / [CO1]

ANS: Accessories and jewellery in ancient Rome were key markers of status, identity, and cultural values, serving not only decorative purposes but also legal, social, and symbolic functions.

Social and Cultural Significance

Accessories were essential to Roman self-presentation. Clothing itself was relatively simple—tunics, togas, stolas—so jewellery and adornments became the primary means of expressing rank, wealth, gender, and even moral character. Roman writers often judged people by their adornment, seeing jewellery as a reflection of virtue or excess.

Indicators of Status and Wealth

- Gold rings were among the clearest status markers. In early Rome, only senators and equestrians were legally permitted to wear gold rings. Over time, this privilege expanded, but the association with elite status remained strong.
- Gemstones such as emerald, sapphire, and garnet were imported from across the empire, signalling wealth and Rome's global reach.
- Pearls were especially prized by elite women; Pliny the Elder notes that pearls were considered the most luxurious of all adornments.

Gender and Identity

Jewellery was worn by both men and women, but with different meanings:

- Women used jewellery to display family wealth and personal virtue. A richly adorned woman reflected her household's prosperity.
- Men wore fewer items, but those they did wear—rings, signet rings, amulets—carried political or legal significance.

Symbolism and Belief

Many accessories had protective or religious functions:

- Amulets (bulla for boys, lunula for girls) were worn from childhood to ward off evil spirits.
- Signet rings engraved with family emblems or gods served both practical and symbolic roles, used to seal documents and assert identity.

Examples of Key Accessories

- Fibulae (brooches): Used to fasten cloaks and tunics, fibulae ranged from simple bronze pins to elaborate gold pieces with enamel or gemstones. They were both functional and decorative.
- Torcs and necklaces: Though more common in Celtic regions, torcs were adopted by Romans as exotic luxury items. Gold chains and pendants were widespread among Roman women.
- Earrings: Often made of gold and set with pearls or gemstones, earrings were a major indicator of feminine elegance.
- Bracelets and armlets: Coiled snake-shaped bracelets were popular, symbolizing protection and eternity.
- Cosmetics and hair accessories: Elaborate hairstyles required pins, combs, and hairnets made of gold or silver. Wealthy women used ornate hairpieces to display status.
- Belts and girdles: Decorative belts emphasized the silhouette of women's stolas and were often adorned with precious metal fittings.

39. Discuss and relate the significance of going barefoot within Ancient Greek social and cultural life. [K] / [CO1]

Going barefoot in Ancient Greece carried multiple social meanings—from poverty and practicality to elite philosophical virtue and athletic excellence—revealing how the Greeks linked the body, status, and moral character.

Going barefoot was common in daily life, especially indoors. All classes removed footwear when entering homes or temples, a practice confirmed archaeologically by the worn exterior steps of Greek buildings.

Outdoors, many children, slaves, and poorer Greeks went barefoot simply because shoes were unaffordable. This made bare feet a marker of poverty, a theme echoed in literary portrayals of figures like Eros

40. Extend your discussion on the silhouette and structure of French Renaissance dress. [U] / [CO2, CO3]

French Renaissance dress evolved from early Italian-influenced softness to highly engineered, structured silhouettes defined by square-necked bodices, boned corsetry, and farthingales that shaped skirts into conical or bell forms, creating a distinctly architectural style of elegance.

The Core Silhouette: Bodice, Waist, and Upper Body

French Renaissance women's dress centered on a structured bodice with a square neckline and a tightly controlled waistline, a form repeatedly emphasized in period descriptions.

These bodices were stiffened with **whalebone, wood, or buckram**, producing a conical torso that flattened the bust and narrowed the waist—an early form of corsetry also noted in broader Renaissance fashion accounts.

- The **square neckline** framed the upper chest and signaled courtly refinement.
- Bodices often incorporated **vertical boning** in the kirtle or undergown to maintain shape,
- By mid-century, Spanish influence introduced heavier, more rigid "**Spanish bodies**," further sharpening the geometric silhouette.

Farthingales and Volume

- The lower silhouette relied on **farthingales**, hoop structures that transformed skirts into sculptural forms.
- The **Spanish farthingale** created a **cone-shaped** skirt, briefly adopted in France before giving way to the **French farthingale**, a padded roll that produced a softer, rounded waistline.
- By the late 16th century, the farthingale evolved into a **bell-like shape**, flattening at the top and narrowing the waist even further.

- These supports redefined how the body occupied space, creating a “visual symphony of elegance” through the interplay of bodice and skirt.

Materials and Their Structural Role

- Luxurious fabrics—**silk, velvet, brocade**—were not only aesthetic choices but structural ones.
- Heavy brocades and velvets added **weight and drape**, reinforcing the sculptural quality of the silhouette.
- Silk, especially from Lyon, provided both **richness and flexibility**, enabling intricate bodice shaping and embroidery.
- Decorative elements such as **lace collars, jeweled sleeves, and embroidered foreparts** emphasized the garment’s architecture and the wearer’s status
