MAHATMA GANDHI UNIVERSITY, KOTTAYAM

MGU – UGP (HONOURS)

FIRST SEMESTER EXAMINATION

(2024 ADMISSION ONWARDS)

MG1MDCECT 101 FOUNDATION OF AI AUTOMATION

Duration : 1 Hour **Max.Marks: 35**

Students should attempt at least one question from each course outcome to enhance their overall outcome attainability

**Remember (K), Understand (U), Apply (A), Analyse (An), Evaluate (E)*

Multiple Choice Questions
Answer any **35** Questions
Each Question carries one mark

1	What is the Turing Test designed to measure? a) Machine intelligence b) Logical reasoning c) Human interaction d) Machine learning capabilities	U	1
2	Which component of the biological neuron transmits signals to other neurons? a) Dendrites b) Axon c) Synapse d) Cell body	U	1
3	What does AI stand for? a) Artificial Intelligence b) Applied Innovation c) Automated Interface d) Artificial Integration	A	1
4	Which language is most commonly used for AI programming? a) Python b) Java c) C++ d) JavaScript	K	1
5	How does Narrow AI differ from General AI? a) It can perform any task b) It specializes in tasks c) It has human emotions d) It thinks independently	A	1
6	What defines the tasks of Narrow AI? a) General application b) Specific application c) Philosophical reasoning d) Emotional intelligence	K	1
7	In the context of AI, what does 'generation' mean? a) Recognizing patterns in data b) Creating entirely new content c) Labeling data d) Improving data accuracy	U	1
8	What is machine learning? a)A method for automating tasks b) A way for computers to learn from data c) A process to manage large data d)A method to enhance human learning	U	1
9	Which type of machine learning requires labeled data? a) Reinforcement learning b) Supervised learning c) Unsupervise d learning d) Deep learning	U	1
10	What is the primary purpose of the input layer in a neural network? a) To process the output b) To feed the input data into the network c) To adjust weights d) To calculate gradients		
11	Which of the following is NOT a challenge in using AI in healthcare? a) Data privacy concerns b) High-quality data availability c) Regulatory hurdles d) Cost- effectiveness	U	2
12	Which of the following is a common application of AI in finance? a) Fraud detection b) Automated trading c) Credit scoring d) All of the above	K	2

13	AI can assist in financial market prediction by: a) Analyzing historical data and market trends b) Generating random forecasts c) Manually reviewing all stock transactions d) Replacing human traders entirely	A	2
14	Which AI technology is commonly used to generate realistic special effects in movies? a) Natural Language Processing (NLP) b) Generative Adversarial Networks (GANs) c) Decision Trees d) Support Vector Machines (SVM)	K	2
15	Which AI technique is commonly used in traffic management systems? a) Reinforcement learning b) Neural networks c) Natural language processing d) Genetic algorithms	K	2
16	What does POS tagging refer to in NLP? a) Predicting the sentiment of a sentence b) Parsing and splitting paragraphs c) Identifying parts of speech in a sentence d) Creating new words from a root word	U	2
17	What is a language model in content generation? a) A model used to summarize images b) A model designed to predict or generate coherent text sequences c) A model that generates audio content d) A model used for processing video data	K	2
18	What does the DALL·E model specialize in generating? a) Music tracks b) Text summaries c) High-quality images based on text descriptions d) Video content	K	2
19	What is the role of chatbots in office automation? a) Analyzing financial data b) Providing real-time support for employee inquiries, customer service, and FAQs c) Printing documents d) Scheduling backups	K	2
20	Which of the following is crucial for tool compatibility? a) Ease of use b) Technical support c) Integration with existing systems d) Cost structure	K	2
21	Who developed ChatGPT? a) Google b) Microsoft c) OpenAI d) IBM	K	2
22	What type of prompt is likely to get a step-by-step guide? a) "Tell me about." b) "Can you give me a step-by-step guide to baking a cake?" c) "How to cook? d) "Explain cooking."	A	2
23	Can ChatGPT provide explanations of the generated code? a) No, it only generates code b) Yes, it can explain the purpose and functionality c) Only for specific programming languages d) Only for complex code	U	2
24	What type of images can Playground AI generate? a) Only abstract art b) Only illustrations c) Both real and imaginative subjects d) Only textures	U	2
25	How does DALL-E learn to generate images? a) User- uploaded photos b) Text prompts c) Existing artworks d) 3D scans	U	2
26	How does DALL-E learn to generate images? a) Through manual input from artists	U	2

b) By analysing existing images and text descriptions
c) By using user feedback only
d) Through gaming techniques

27	Which type of images are not supported by MidJourney? a) Abstract art b) Portraits c) Live-action photographs d) Conceptual illustrations	U	2
28	What is Supervised Learning? a) Learning with labelled data b) Learning without data c) Learning from mistakes d) Learning from actions	U	3
29	What is clustering? a) A way to sort data b) A way to group similar data points c) A way to label data d) A way to predict outcomes	K	3
30	What is a "reward"? a) A prize for winning b) A signal to help learning c) A mistake made d) A type of data	E	3
31	Why is ethics important in AI? a) To make AI faster b) To ensure fairness and safety c) To make AI more complicated d) To save money	E	3
32	How does AI help social media? a) By creating more ads b) By personalizing user experiences c) By making users stay longer d) By reducing content	E	3
33	What is “responsible AI” a) AI that always makes the best choices b) AI that considers ethical implications in decisions c) AI that operates without any rules d) AI that is difficult to understand	U	3
34	What is one societal impact of AI? a) Creating more jobs b) Reducing decision- making speed c) Changing how people interact d) Increasing manual work	K	3
35	What is the importance of ethical training for AI developers? a) To increase costs b) To ensure they understand the impact of their work c) To complicate the development process d) To limit creativity	E	3
36	Supervised learning works best with: a) Labeled data b) Random data c) No data d) Sorted data	K	3
37	Which of these is NOT an unsupervised learning method? a) K-Means b) Hierarchical Clustering c) Logistic Regression d) DBSCAN	E	3
38	What is user privacy? a) Keeping user information safe b) Sharing all user data c) Making users register for everything d) Ignoring user preferences	A	3
39	What does "responsible AI use" mean? a) Using AI for profit only b) Ensuring AI benefits society c) Ignoring ethical concerns d) Making AI more complicated	A	3
40	What is the goal of ethical considerations in AI? a) To make AI systems more complex b) To ensure technology benefits all users c) To maximize data usage d) To ignore public opinion	A	3

1 * 35 = 35
