MAHATMA GANDHI UNIVERSITY, KOTTAYAM

MGU-UGP (HONOURS)

THIRD SEMESTER EXAMINATION

(2024 ADMISSION ONWARDS)

MG3DSCAQC200 – Culture of Fish Food Organisms

Duration: 2 hrs Maximum Marks: 70

Students should attempt atleast one question from each course outcome to enhance their overall outcome attainability.

Part A
Very Short Answer Questions
Answer any 10 out of 12
Each question carries 2 marks

1. Name an equipment which is commonly used to collect phytoplankton from surface water? [1] [U]

2. Diatoms belong to which algal class? [1] [U]

3. What is the primary function of the cod-end in a plankton net? [2] [A]

4. Give the scientific name of one marine water infusoria. [3,5] [U]

5. Name an alternative live feed which shows the process of regeneration? [3,5] [A]

6. What is the significance of maintaining aeration in rotifer culture tanks? [2] [A]

7. What is the ideal salinity range for culturing rotifer sp.? [2] [U]

8. Name any two microalgae. [2] [U]

9. Name any two nutrients used for the enrichment of Artemia. [1] [U]

10. What is the common name for cladocerans and rotifers? [2] [U]

11. Name any two species of Artemia [2] [U]

12. List of any two insect larvae which are used in fish feed. [2] [U]

[2 x10 =20] Marks

Part B
Short Answer Questions
Answer any 8 Questions
Each question carries 5 marks

13. Describe the decapsulation procedure for Artemia cyst. [4] [U]

14. Write a note on different media used for culture of phytoplankton. [2] [U]

15. Write a short note on artemia enrichment. [4] [U]

16. Describe the methods of collection, maintenance and rearing of rotifers used in aquaculture. [2] [U]

17. Differentiate between precocial and altricial larvae with suitable examples. [1] [A]

18. Define phytoplankton. What is the significance of phytoplankton in the culturing of fish food organisms. [2] [A]

19. Distinguish between wriggler and tumbler with suitable diagrams. [3,5] [A]

20. With suitable examples, write short notes on the importance of Chironomids [3,5] [U]

21. Explain the methods of collection, maintenance and rearing of copepod and Insect larvae [2] [U]

22. . Explain the methods of collection, maintenance and rearing of Cladoceran and Insect larvae [2] [U]

[5 x 8 = 40] Marks

Part C
Essay Type Questions
Answer any one Question
Each question carries 10 marks

23. Define periphyton. Explain their development and benefits in aquaculture. [4] [A]

24. Describe the methods involved in the phytoplankton collection. [5] [U]

25. Write the steps for collection, maintenance and rearing of Copepods .[2] [U]

[10 x 1 = 10] Marks
