MAHATMA GANDHI UNIVERSITY

THIRD SEMESTER UG PRACTICAL EXAMINATION

Course: MG3DSCCHE200- Inorganic Chemistry-1(Practical)

Model Questions

Time -3 hr. Total marks: 35

Part-I (5 marks)

Write the principle and procedure (Select One)

1. Preparation of hexaaquacobalt (II) ion
2. Preparation of hexaaquacopper (II) ion
3. Preparation of hexaaquanickel (II) ion
4. Preparation of Prussian blue.

Part-II (2 marks)

Visual identification of Metal Salts (Select One)

5. Write the name, color of the complex provided. Write down the central metal with oxidation state.

Part-III (13 marks)

Conduct the experiment (Select One)

6. Estimate the mass of calcium in the whole of the given solution of calcium chloride. You are supplied with 0.1 molar EDTA solution and zinc sulphate crystals .
7. Estimate the mass of magnesium in the whole of the given solution of Magnesium sulphate. You are supplied with 0.1 molar EDTA solution and zinc sulphate crystals.
8. Estimate the mass of zinc in the whole of the given solution of zinc sulphate. You are supplied with 0.1 molar EDTA solution and zinc sulphate crystals.

Part-IV (13 marks)

Conduct the experiment (Select One)

9. Estimate the mass of ferrous ion in the whole of the given solution of Mohr's salt. You are supplied with 0.02 M $KMnO_4$ and oxalic acid crystals

10. Estimate the mass of oxalic acid in the whole of the given solution. You are supplied with 0.02 M $KMnO_4$ and Mohr's salt crystal.
11. Estimate the mass of calcium in the whole of the given solution of calcium chloride. You are supplied with 0.02 M $KMnO_4$ and oxalic acid crystal.

12. Viva voce (10 marks)

13. Lab report (5 marks)

Instructions

- Assign one experiment from Part III or Part IV to each student.
- Experiments from Part I, Part II, Part III, and Part IV must be recorded in the lab record
