**MAHATMA GANDHI UNIVERSITY, KOTTAYAM**
**MGU-UGP (HONOURS)**
**FIRST SEMESTER EXAMINATION**
**(2024 ADMISSION ONWARDS)**
**COURSE CODE- MG3DSCFTQ200**
**COURSE TITLE: FOOD PRESERVATION**

Duration:1.5hrs Maximum Marks: 50

Part **A**

Short Answer Type Questions

Answer any **5** questions

Each question carries **2** Marks

1. What is the need for preservation of food? [U]/[CO1]
2. Narrate the role of FDV.[U]/[CO2]
3. What is the function of a hydrolock in hydrolock pressure sterilisers?[K]/[CO2]
4. What do you mean by the term intermittent thawing? [K]/[CO2]
5. Distinguish between slow freezing and quick freezing[An]/[CO4]
6. Discuss the role of sugar as preservative agent.[An]/[CO3]
7. Which preservation method is called cold sterilisation and why? [U]/[CO2]

(5x2=10 marks)

Part **B**

Short Essay Type Questions

Answer any **5** questions

Each question carries **4** Marks

8. With the help of a neat diagram explain the vapour compression cycle of refrigerator. [U]/[CO3]
9. Give a detailed account on the construction and working of freeze dryer.[U]/[CO5]
10. Enumerate the basic principles of preservation. [K]/[CO1]
11. Describe the characteristics of irradiation sources used in preservation of food.[An]/[CO2]
12. Give a brief account of factors affecting osmotic dehydration process.[U]/[CO3]
13. With the help of a neat diagram, explain drying curve. [K]/[CO5]
14. Distinguish between LTLT and HTST methods of pasteurisation.[An]/[CO2]

(5x4=20 marks)

Part **C**

Long Essay Type Questions

Answer any **2** questions

Each question carries**10** Marks

15. Define hurdle technology and state the mechanism by which it affects the microbial growth. With the help of hurdle diagrams explain the hurdle effects in food.[U]/[CO2]
16. Define canning with a brief note on its history. Enumerate in detail the process of canning of foods.[U]/[CO4]
17. With the help of a neat diagram describe the components and working of a HTST pasteuriser. [K]/[CO2]
18. Make a detailed note on the following concentration methods
    (1) Concentration by removal of heat
    (2) Thermal concentration
    (3) Concentration by using membranes [An]/[CO3]

(2x10=20 marks)
