QP CODE: …….. **Reg No:……**

Name:…….

BSM (Honors) DEGREE EXAMINATION, OCTOBER 2025 Third SEMESTER
BACHELOR OF SPORTS MANAGEMENT (BSM)
MINOR: MG3DSCSAC200
Speed, Agility, Quickness and Plyometrics
2024 ADMISSION ONWARDS

Time: 1.5 Hours **Total Marks:50**

CO No	Course Outcomes
1	Understand the sports marketing environment and trends influencing marketers.
2	Explain how marketing concepts related to the marketing mix (product, price, place and promotion) apply to sports- related settings.
3	Able to identify and use or implement the marketing research resources
4	Successfully evaluate the viability of a target market segment or any other aspect of the marketing mix
5	Able to understand the personal selling process and demonstrate an ability to apply the personal selling process to a sports setting.

	Part A (MCQ) Answer **All** Questions (Mark **1** each)			Module & Unit
1.	What does the term "speed" refer to in sports performance? A) The ability to lift heavy weights B) The ability to change direction quickly C) The ability to move quickly from one point to another D) The ability to maintain flexibility	CO1	U	1.1
2.	Which component is NOT part of the SAQ training principle? A) Flexibility B) Speed C) Strength D) Agility	C02	An	1.3
3.	Which fitness component is most improved by shuttle runs? A) Cardiovascular endurance B) Agility C) Flexibility D) Muscular strength	C01	C	2.3

4.	Plyometric exercises are useful in SAQ training because they: A) Improve muscle flexibility B) Improve explosive power and speed C) Increase lung capacity D) Reduce body fat percentage	C0 4	E	3.1

5.	10. Which test is commonly used to measure agility? A) Beep test B) Sit and reach test C) T-Test D) VO2 max test	C01	A	1.2
6.	Which of the following best defines agility? A) The ability to run long distances B) The ability to jump high C) The ability to move and change direction quickly while maintaining control D) The ability to react to a sound cue	C01	U	1.1
7.	Which training tool is most commonly used in SAQ drills? A) Resistance band B) Agility ladder C) Dumbbell D) Treadmill	C02	A	1.3
8.	What is the main goal of plyometric training? A) Improve flexibility B) Increase cardiovascular endurance C) Enhance explosive power and speed D) Develop slow-twitch muscle fibers	C04	K	3.3
9.	What does "quickness" refer to in sports training? A) The ability to maintain endurance B) The ability to produce maximum force C) The ability to react and move rapidly to a stimulus D) The ability to recover after fatigue	C03	Ap	3.3
10.	Which test is commonly used to assess sprinting speed? A) Cooper test B) 40-yard dash C) Sit and reach test D) Harvard step test	C05	An	2.3
			(10 × 1 = 10 Marks)	

Part B (Short Answer Questions)

Answer any **Ten** Questions (Marks **2** each)

11.	Explain the term "quickness" in SAQ training?	C01	U	1.3
12.	Define speed in the context of physical performance?	C02	An	1.1
13.	List two physiological benefits of regular SAQ training?	C01	K	1.1

14.	Mention any two common drills used to improve speed?	C05	E	2.2
15.	Why is proper landing technique important in plyometric training?	C01	An	4.1
16.	Name few sports where agility is crucial?	C03	K	1.1
17.	How is quickness different from speed?	C01	E	1.2
18.	Mention any two common drills used to improve speed?	C05	An	2.2
19.	How does SAQ training benefit young athletes?	C02	U	1.3
20.	What are the types of speed?	C04	U	4.1
21.	Name one upper-body plyometric exercise	C04	K	3,4
22.	What are the key safety considerations when performing plyometric exercises	C01	Ap	4.4
	(10 x 2) = 20 Marks			

Part C (Short Essay Questions)

Answer any **Four** Questions (Marks 5 each)

23.	Explain the importance of Speed, Agility, and Quickness (SAQ) training in modern sports performance. Include examples from different sports.	C03	E	1.4
24.	Compare and contrast the concepts of speed, agility, and quickness. How do they interact and contribute to overall athletic performance	C02	Ap	1.3
25.	Design a one-week SAQ training program for a team sport athlete (e.g., football, basketball, or hockey). Justify the selection of exercises and their progression	C05	E	2.2
26.	Discuss the physiological and neuromuscular adaptations that occur in the body as a result of regular SAQ training	C03	U	3.4
27.	Analyze the importance of proper technique and surface selection in plyometric exercises. What risks are associated with poor execution or unsafe training conditions	C01	An	4.4
28.	Evaluate the benefits and limitations of incorporating plyometric exercises into a training program for athletes in speed and power sports. Provide specific examples.	C04	S	1.3

(4 × 5 = 20 Marks)
