MAHATMA GANDHI UNIVERSITY, KOTTAYAM

MGU-UGP (HONOURS)

THIRD SEMESTER B.COM EXAMINATION- MODEL QUESTION PAPER

(2024 ADMISION ONWARDS)

MG3DSECOM205 – Fundamentals of Logistics Management

Duration: 1 hr 15 minutes Maximum Marks: 70

Students should attempt at least one question from each course outcome to enhance their overall outcome attainability.

Part A- Multiple Choice Questions

Attempt any **twenty** questions. Each question carries **1 mark**.

1. In the evolution of logistics, what was the primary impact of the Industrial Revolution? [U] [CO1]

a) Increased use of digital platforms b) Decentralization of supply chains
c) Massive scale production and centralized distribution d) Adoption of reverse logistics

2. What was the major shift in logistics during the rise of e-commerce? [U] [CO1]

a) Dependence on maritime routes b) Decreased use of intermodal transportation

c) Focus on mass warehousing d) Emphasis on last-mile delivery and fulfillment centers

3. Which of the following is not typically part of outbound logistics? [U] [CO1]

a) Order fulfillment b) Customer delivery

c) Final packaging **d)** Raw material procurement

4. Which logistics model is most strategic and tech-driven in modern e-commerce? [U] [CO1]

a) 3PL b) 4PL c) 5PL d) 2PL

5. AI in logistics can be used for: [An] [CO4]

a) Predictive demand forecasting b) Manual inventory counting

c) Paper-based documentation d) Fixed-route optimization only

6. Identify the storage solution that differentiates itself from normal warehousing by preventing chemical contamination. [U] [CO1]

a) Silos b) Bonded warehouses c) Specialty storage d) Open storage

7. What does AS/RS refer to in warehouse automation? [U] [CO1]

a) Automatic Shipping and Receiving System b) Automated Storage and Retrieval System

c) Agile Storage/Routing Solutions d) Auto-Stock Rotation Solution

8. Which of the following is NOT a key component of LRM? [U] [CO4]

a) Transportation management b) Warehouse management

c) Customer Relationship Management d) Predictive demand analysis

9. Which of the following challenges is MOST associated with IoT in logistics? [An] [CO4]

a) Data security and privacy issues b) Lack of customer demand

c) Increased paper invoices d) Shorter supply chains

10. A warehouse security audit primarily helps in: [U] [CO3]

a) Reducing material handling costs b) Improving only employee morale

c) Identifying gaps in safety procedures and physical protection d) Increasing warehouse size

11. The label on a medicine strip is part of which packaging? [U] [CO2]

a) Secondary packaging b) Primary packaging c) Bulk packaging d) Tertiary packaging

12. Safety stock is maintained to: [An] [CO3]

a) Protect against stockouts due to demand variability b) Increase storage costs

c) Reduce inventory turnover d) Comply with tax regulations

13. What is a Bill of Lading (BOL)? [U] [CO3]

a) A fuel receipt b) A maintenance record

c) A driver's license d) A legal document detailing shipment information

14. Public vs. Private warehouses differ mainly in: [U] [CO3]

a) Ownership and usage flexibility b) Customs clearance

c) Insurance d) Packaging

15. Which of the following is NOT a function of warehousing? [U] [CO3]

a) Storage b) Risk management c) Order fulfilment d) Celebrity endorsements

16. Automated Guided Vehicles (AGVs) are examples of: [U] [CO2]

a) Manual equipment b) Automated material handling equipment

c) Non-mechanized tools d) Safety gear

17. Which of the following is an example of an industrial truck? [U] [CO2]

a) Forklift b) Conveyor c) Crane d) Robotic picker

18. EOQ is used to: [An] [CO3]

a) Minimize inventory cost b) maximise storage Space

c) Increase picking speed d) Reduce shipping time

19. The final stage of the warehouse operational mechanism is: [U] [CO3]

a) Quality check b) picking c) shipping d) put away

20. What is the primary function of GS1 standards for both barcodes and RFID tags? [U] [CO2]

a) To ensure universal product identification and traceability across different companies and countries.

b) To regulate the cost of RFID tags and barcode labels for consumers.

c) To create a national database of all products sold within a single country.

d) To certify that a product is organic and environmentally friendly.

21. In electronics, reverse logistics focuses on: [U] [CO1]

a) Forward shipment of goods b) Return and recycling of e-waste

c) Increasing electricity use d) Expanding storage space

22. Which of the following is a key component of green logistics? [U] [CO1]

a) Traditional transportation methods b) Use of non-renewable energy sources

c) Sustainable packaging and waste reduction d) High carbon emissions

Part B- Multiple Choice Questions

Attempt any **twenty-five** questions. Each question carries **2 marks**.

23. In the modern era, which term best describes the approach of linking all logistics functions into one seamless process? [U] [CO1]

a) Retail optimization b) Integrated logistics

c) Multimodal warehousing d) Autonomous supply chains

24. Which scenario justifies the use of 6PL logistics? [U] [CO1]

a) A firm needing overnight domestic delivery

b) A traditional manufacturer outsourcing freight to a trucker

c) A firm requiring AI-powered, real-time autonomous supply chain decision-making

d) A retail outlet shipping products manually

25. Consider the following statements: Assertion (A) and Reason(R). Choose the correct alternative.
Assertion (A): Logistics optimization improves sustainability.

Reason (R): Optimized routes and load planning reduce fuel use and emissions. [U] [CO1]

a) Both A and R are true, and R is the correct explanation of A.

b) Both A and R are true, but R is not the correct explanation of A.

c) A is true, but R is false. d) A is false, but R is true.

26. Consider the following statements and choose the right alternative. [U] [CO1]

Statement 1: Logistics is essential in ensuring products reach the right place at the right time.

Statement 2: Logistics does not include information flow.

a) Both statements 1 and 2 are true b) Statement 1 is true and statement 2 is false
c) Statement 1 is false and statement 2 is true d) Both statements 1 and 2 are false

27. Consider the following statements: Assertion (A) and Reason(R). Choose the correct alternative.
Assertion (A): Integrating ERP, WMS, and TMS improves logistics efficiency.

Reason (R): Integration allows better coordination of resources across departments. [An] [CO3]

a) Both A and R are true, and R is the correct explanation of A.

b) Both A and R are true, but R is not the correct explanation of A.

c) A is true, but R is false. d) A is false, but R is true.

28. Which conditions warrant implementing a perpetual inventory system? [An] [CO3]

I. High-value inventory items II. Frequent stock movements

III. Regulatory compliance requirements IV. Need for real-time inventory visibility

a) I and II only b) I, III, and IV only c) II, III, and IV only d) All conditions I, II, III, and IV

29. EDI security measures should include: [An] [CO4]

I. Data encryption during transmission

II. Partner authentication and authorization

III. Digital signatures for document integrity

IV. Audit trails for all transactions

a) I and II only b) I, II, and III only c) II, III, and IV only d) All measures I, II, III, and IV

30. Consider the following statements: Assertion (A) and Reason(R). Choose the correct alternative.
Assertion (A): Pallet trucks are used for moving palletized loads over short distances.

Reason (R): Pallet trucks are designed to lift loads to great warehouse heights. [U] [CO2]

a) Both A and R are true, and R is the correct explanation of A.

b) Both A and R are true, but R is not the correct explanation of A.

c) A is true, but R is false. d) A is false, but R is true.

31. Which of the following statements about hoppers is correct? [U] [CO2]

1. Hoppers are used to store bulk materials temporarily before further processing.

2. They allow controlled discharge of materials like coal, grain, or cement.

3. Hoppers are mainly designed for transporting passengers in industries.

4. They are often used in combination with silos and conveyors.

a) 1 and 2 only b)1, 2, and 4 only c) 2, 3, and 4 only d) 1, 2, 3, and 4

32. Consider the following statements and choose the most appropriate alternative. [U] [CO2]

Statement I: Structural packaging design focuses only on visual branding.

Statement II: Packaging graphics and colors are the main determinants of transport efficiency.

a) Both statements are true. b) Statement I is true, and Statement II is false.

c) Statement I is false, and statement II is true. d) Both statements are false.

33. Consider the following statements and choose the most appropriate alternative. [U] [CO2]

Statement I: The use of eco-friendly and recyclable packaging is encouraged under packaging compliance rules.

Statement II: This helps in reducing environmental impact and supports sustainable business practices.

a) Both statements are true. b) Statement I is true, and Statement II is false.

c) Statement I is false, and statement II is true. d) Both statements are false.

34. Consider the following statements: Assertion (A) and Reason(R). Choose the correct alternative.
Assertion (A): The National Logistics Policy (2022) aims to reduce logistics costs.

Reason (R): It does so through standardized services and digital platforms. [U] [CO3]

a) Both A and R are true, and R is the correct explanation of A.

b) Both A and R are true, but R is not the correct explanation of A.

c) A is true, but R is false. d) A is false, but R is true.

35. Which of the following is a direct benefit of repackaging? [U] [CO2]

a) Customizing products for marketing requirements b) Eliminating transportation costs

c) Reducing demand d) Replacing warehouse equipment

36. Consider the following statements and choose the most appropriate alternative. [U] [CO3]

Statement I: Smart warehouses improve accuracy and efficiency.

Statement II: They avoid the use of advanced technology.

a) Both statements are true. b) Statement I is true, and Statement II is false.

c) Statement I is false, and statement II is true. d) Both statements are false.

37. Consider the following statements on last-mile delivery: [U] [CO4]

Statement (1): It contributes disproportionately to logistics costs compared to long-haul freight.

Statement (2): It is a major source of urban traffic congestion and emissions.

Statement (3): Drone-based delivery and electric vehicles are emerging as sustainable alternatives.

Statement (4): Last-mile delivery efficiency improves automatically as shipment volumes increase, without the need for innovation.

Which of the above statements are correct?

a) (1) and (4) only b) (1), (2), and (3) only c) (2), (3), and (4) only d) (1), (2), (3), and (4)

38. Consider the following statements and state which of the statements are true. [An] [CO3]

Statement (1): In ABC, 'A' items require continuous monitoring because of their high value.

Statement (2): Safety stock provides a buffer against demand or supply uncertainty.

Statement (3): If the carrying cost per unit increases, EOQ decreases.

Statement (4): In JIT, large safety stocks are maintained to avoid stockouts.

a) (1), (2) and (3) only b) (2), (3) and (4) only c) (1), (2), (3) and (4) d) (1), (2) and (4) only

39. Choose the right pair. [U] [CO4]

A. Order accuracy → (i). Builds customer trust

B. Communication → (ii). Real-time updates on shipments

C. Returns management → (iii). Long-term loyalty

D. Personalization → (iv). Flexible delivery options

a) A-i, B-ii, C-iii, D-iv b) A-ii, B-i, C-iii, D-iv c) A-i, B-ii, C-iii, D-iv d) A-i, B-iii, C-ii, D-iv

40. Consider the following statements: Assertion (A) and Reason(R). Choose the correct alternative.
Assertion (A): IoT enables real-time tracking of goods in transit.

Reason (R): IoT devices transmit live data on the location and condition of goods. [An] [CO4]

a) Both A and R are true, and R is the correct explanation of A.

b) Both A and R are true, but R is not the correct explanation of A.

c) A is true, but R is false. d) A is false, but R is true.

41. Consider the following statements and choose the most appropriate alternative. [U] [CO1]

Statement 1: Globalization has increased the complexity of the supply chain.

Statement 2: Logistics focus on domestic transportation.

a) Both statements 1 and 2 are true b) Statement 1 is true and statement 2 is false

c) Statement 1 is false and statement 2 is true d) Both statements 1 and 2 are false

42. Which of the following best describes cross-docking? [U] [CO3]

a) Storing goods for long-term use b) Direct transfer from inbound to outbound trucks

c) Shipping goods internationally d) Selling goods at lower prices

43. Consider the following statements: Assertion (A) and Reason(R). Choose the correct alternative.
Assertion (A): Reverse logistics is also known as backward logistics.

Reason (R): It involves the flow of goods from customers back to producers. [U] [CO1]

a) Both A and R are true, and R is the correct explanation of A.

b) Both A and R are true, but R is not the correct explanation of A.

c) A is true, but R is false. d) A is false, but R is true.

44. Consider the following statements and choose the most appropriate alternative. [U] [CO1]

Statement I: Green logistics reduces greenhouse gas emissions by promoting cleaner transport.

Statement II: Green logistics improves brand reputation by showing commitment to sustainability

a) Statement I is true, Statement II is false b) Statement I is false, Statement II is true

c) Both statements are true d) Both statements are false

45. Refurbishing and reselling is most common in which industry? [U] [CO1]

a) Fast-moving consumer goods (FMCG) b) Luxury fashion

c) Electronics (e.g., smartphones, laptops) d) Petroleum and gas

46. A warehouse moves pallets from receiving to storage using a mechanized system along a fixed path. Which equipment is being described? [U] [CO2]

a) Conveyor system b) Forklift c) AGV d) Hand pallet truck

47. Which of the following is a common warehouse layout? [An] [CO3]

1. I shaped 2. Dynamic layout 3. Grid layout 4. L-shaped

a) 1,2 & 3 only b) 2,3 & 4 only c) 1,2 & 4 only d) All of them

48. Which of the following are the core functions of warehousing? [U] [CO3]

1. Packing 2. Storage 3. Production 4. Receiving

a) 1 & 2 and 3 only b) 1,2, and 4 only c) 2,3, and 4 only d) All of them

49. Choose the right pair. [An] [CO4]

A. Data security & privacy → (i) Overwhelming amounts of raw information

B. Integration complexity → (ii) High upfront investment

C. High implementation costs → (iii) Vulnerability to cyberattacks

D. Data overload → (iv) Compatibility issues across devices

a) A–(ii), B–(iii), C–(iv), D–(i) b) A–(iii), B–(iv), C–(ii), D–(i)

c) A–(iv), B–(i), C–(iii), D–(ii) d) A–(i), B–(iv), C–(ii), D–(iii)
