MAHATMAGANDHI UNIVERSITY,KOTTAYAM

THIRD SEMESTER MG-UGP (HONOURS) REGULAR EXAMINATION-----2025

MG3DSEECO204- NAVIGATING SURVEYS FOR ACADEMIC AND PROFESSIONAL SUCCESS
(2024 ADMISSION ONWARDS)

Duration: 2 Hrs. **Maximum Marks: 70**

Remember(K), Understand(U), Apply(A), Analyse (An), Evaluate(E), Create(C), Skill(S), Interest(I) and Appreciation (Ap)

Students should attempt at least one question from each course outcome to enhance their overall outcome attainability.

Part A

Multiple Choice Question
Answer all questions
Each question carries 1 mark

1. Which of the following correctly matches the type of data with its definition?

A. Primary data – Collected from already published sources
B. Secondary data – Collected directly from the field by the researcher
C. Primary data – First-hand data collected through surveys or interviews
D. Secondary data – Data obtained through laboratory experiments

[U][2]

2. Social and Economic Surveys are typically conducted to:

A. Promote political campaigns
B. Understand social conditions and economic trends
C. Replace government censuses
D. Eliminate the need for fieldwork [U][3]

3. What is the main purpose of conducting a pilot survey?

A. To publish preliminary results
B. To reduce the size of the sample
C. To test the questionnaire and identify flaws
D. To conduct participatory analysis [U][4]

4. Which of the following is *not* typically included in a well-structured study proposal for a survey research project?
A. Statement of the problem
B. Time budget

C. Chapter scheme
D. Marketing strategy [U][4]

5. Why is a 'review of previous studies' important in survey research planning?
A. To avoid writing a hypothesis
B. To limit the geographical area of the study
C. To understand gaps in existing knowledge and justify the study
D. To reduce the financial budget [U][4]

6. In which type of sampling are participants selected based on a specific purpose or judgment?

A. Simple random sampling
B. Systematic sampling
C. Purposive sampling
D. Cluster sampling [U][5]

7. Which of the following factors is most important in determining the appropriate sample size?

A. Size of the population
B. Convenience of the researcher
C. Number of questionnaires available
D. Time of the year [U][5]

8. Which of the following is a primary data collection method that involves direct interaction with the respondent?

A. Literature Review
B. Interview
C. Census Data
D. Government Reports [U][2]

9. A structured interview is characterized by:

A. Open-ended and spontaneous questions
B. Pre-determined and standardized questions
C. Use of participatory rural appraisal
D. No prior plan or framework [U][5]

10. The process of assigning numerical or symbolic codes to responses for ease of analysis is called:

A. Editing
B. Coding
C. Tabulation
D. Classification [U][6]

(10x1 = 10)

Part B

Short Answer

Answer any 10 questions

Each question carries 3 marks

11. Differentiate between primary data and secondary data. [A][2]
12. What is the main difference between a descriptive study and a diagnostic study in scientific inquiry? [An][3]
13. List any four methods of scientific inquiry. [U][2]
14. Mention two advantages and two limitations of survey research. [A][3]
15. What are the major components included in a study proposal or survey plan? . [An][6]
16. Differentiate between Census Enquiry and Sampling. [A][5]
17. What is the difference between purposive and non-purposive sampling? [U][5]
18. What is the difference between structured and unstructured interviews in primary data collection? [A][5]
19. Define reliability and validity in the context of data collection tools. [U][2]
20. What is the purpose of a pilot survey in the research process? [U][4]
21. What is meant by editing and coding in data processing? [U][5]
22. Define classification in the context of data processing. [A][6]
23. List any three common types of graphical representation used in research. [U][6]
24. What are the different types of systematic sampling? [U][5]
25. What are the major steps involved in writing a research report? [A][5]

(10 x 3 = 30)

Part C

Short Essay Questions

Answer any 5 questions

Each question carries 6 marks

26. Describe the characteristics, strengths, and limitations of action research as a method of scientific inquiry. [A][1]
27. Compare and contrast case studies, field studies, and surveys as methods of data collection in social research. [A][2]
28. Distinguish between pure and applied research, and explain their relevance in modern research contexts. [U][1]
29. What is the difference between census and sample methods in survey research? Mention two advantages of each. [A][4]
30. What is a pilot survey? Explain its role in improving the effectiveness of a survey. [A][6]
31. Discuss the main purposes of a survey and describe its subject matter using examples from social and economic surveys. [U][1]
32. What are the components of a well-structured study proposal or research plan? Discuss its importance in survey research. [U][3]
33. Define stratified, systematic, and cluster sampling. How are they different from simple random sampling? . [U][5]
34. Describe the various stages of data processing and explain how editing, coding, and classification are performed. [A][4]

35. Explain the use of spreadsheets in data analysis and describe how pivot tables can assist in summarizing survey data. [A][5]

(5 x 6 = 30)
