MAHATMA GANDHI UNIVERSITY , KOTTAYAM

MGU-UGP BSc. (HONOURS) FASHION DESIGNING

THIRD SEMESTER MODEL EXAMINATION, OCTOBER

(2024 ADMISSION ONWARDS)

VALUE ADDED COURSE - MG3VACTXLA03

TEXTILE PROCESSING AND FINISHING

Duration : 1.50 Hours Maximum marks: 50

Students should attempt at least one question from each course outcome to enhance their overall outcome attainability.

Part A

Multiple choice question, each carry 1 marks (1*10=10)

1. What type of defect does singeing help to prevent?
   A) color bleeding
   B) fabric shrinkage
   C) pilling
   D) fading
2. Which type of enzyme is commonly used for enzymatic desizing?
   A) Lipase
   B) Amylase
   C) Protease
   D) Cellulose
3. Which chemical is commonly used in the souring process?
   A) Sodium hydroxide
   B) Hydrochloric acid
   C) Sulfuric acid
   D) Acetic acid
4. Which fabric property is enhanced by calendaring?
   A) Weight
   B) Stretch
   C) Gloss
   D) Elasticity
5. Winch dyeing is mainly used for:

A) Yarn dyeing
B) Loose fiber dyeing
C) Fabric in rope form
D) Beam dyeing

6. In jig dyeing, the fabric passes through the dye bath:
   A) Once only
   B) Several times back and forth
   C) Only in rope form
   D) By high-pressure jets
7. In cross dyeing, different fibers in the same fabric are dyed:
   A) With the same dye
   B) With different dyes in the same bath
   C) After printing
   D) One fiber at a time
8. Which of the following is not a type of batch dyeing machine?
   A) Jet dyeing machine
   B) Beam dyeing machine
   C) Jig dyeing machine
   D) Thermosol dyeing machine
9. Pad dyeing is commonly used for:
   A) Loose fiber dyeing
   B) Yarn dyeing
   C) Woven and knitted fabric dyeing
   D) Stock solution dyeing
10. What is the main purpose of mercerization?
    A) To clean the fabric
    B) To soften the fabric
    C) To increase luster and strength
    D) To remove color

Part B

Fill in the blanks, each carry 1 marks (1*10=10)

11. _____ is the process of applying color to textile materials in a permanent way.
12. Synthetic dyes are made from _____ compounds.
13. Madder dye produces shades of _____.
14. Disperse dyes are mainly used to dye _____ fibers.
15. _____ dyeing is often carried out in a machine called a stock dyeing machine or kier.
16. _____ dyeing is used for continuous fabric dyeing in large quantities.
17. Winch dyeing operates at relatively _____ tension, making it suitable for delicate fabrics.

18. Jet dyeing machines operate at _____ tension, making them suitable for delicate fabrics.
19. Jig dyeing is a _____ process where fabric is dyed in open-width form.
20. Union dyeing ensures _____color appearance in blended fabrics.

Part C

Fill in the blanks, each carry 1 marks (1*10=10)

21. Which process follows sizing in fabric production?
22. What common fabric defect is reduced by singeing?
23. What shape does the cotton fiber become after mercerization?
24. Which finish uses rollers to smooth and shine fabric?
25. What process is used to whiten textiles?
26. Name one machine used for fabric dyeing in rope form.
27. What is the form of fabric used in winch dyeing?
28. How many rollers are used to wind the fabric in jig dyeing?
29. Name the dyeing method opposite to union dyeing.
30. What type of dying process is pad dyeing — batch or continuous?

Part D

Short answer question, answer any 5 question, each carries 2 marks (2*5=10)

31. What type of dying process is pad dyeing — batch or continuous?
32. Define jig dyeing.
33. Discuss the advantages and limitations of jig dyeing.
34. Explain the process of batch dyeing.
35. How does mercerization affect the structure of cotton fibers?
36. Name two special types of calendaring and their effects.

Part E

Long answer, answer any 2 question, each carries 5 marks (2*5=10)

37. Explain the process of stock dyeing in textiles.
38. Explain the process of stock dyeing in textiles.
39. Explain the process of top dyeing in textiles.
40. Explain the fabric printing in textiles.
