MAHATMA GANDHI UNIVERSITY, KOTTAYAM

MGU-UGP (HONOURS)

Fourth Semester **Practical** Examination-**Model Question Paper**

(2024 Admission Onwards)

Course: MG4DSCCHE200- Organic Chemistry-2

Time -3 Total marks: 35

1. Identify the functional group in the given organic compound using qualitative microscale analysis. -*15 marks*

   (Students may be provided with a carboxylic acid, dicarboxylic acid, ester, phenol, aldehyde, or ketone. They are expected to carry out a systematic qualitative **microscale** analysis, including preliminary examination, identification of the functional group(s), performance of suitable confirmatory tests, and explanation of the chemistry underlying the positive/key tests)

2. Prepare a derivative for the given compound-*5 marks*
3. Viva voce based on the practical topics- *10 marks*
4. lab report- *5 marks*
