MAHATMA GANDHI UNIVERSITY, KOTTAYAM

Fourth Semester MGU-UGP (Honours) Regular Examination

(2024 Admission Onwards)

MG4DSCTRS200 – TRANSLATION FOR THE MEDIA

Duration: 2 hrs Maximum Marks: 70

Students should attempt at least one question from each course outcome to enhance their overall outcome attainability.

Learning Domains: Remember (K), Understand (U), Apply (A), Analyse (An), Evaluate (E), Create (C), Skills (S), Interest (I) and Appreciation (Ap)

MODEL QUESTION PAPER

Part A

Multiple Choice Questions.

Answer all questions. Each question carries 1 mark.

1. Which of the following is not typically a role in the AD profession? [U / CO4]
    a. Audio Describer / Script Writer
    b. Live AD Provider
    c. Visual Effects Artist
    d. Quality Controller / Reviewer
2. Don Vito rejects Sollozzo primarily because [A / CO3]
    a. He dislikes Sollozzo personally
    b. Narcotics attracts political heat
    c. The profits are low
    d. He fears losing Sonny's loyalty
3. Which of the following is not one of the three kinds of synchrony listed by Chaume? [U / CO2]
    a. Lip synchrony
    b. Isochrony
    c. Kinetic synchrony
    d. Semantic synchrony
4. A describer who says "She looks sad" rather than describing visible cues is guilty of [A / CO4]
    a. Neutral reporting
    b. Over-interpretation
    c. Effective AD practice
    d. Necessary cultural mediation
5. Which news value best describes stories that touch hearts and focus on individual experiences? [U / CO 1]
    a. Prominence
    b. Human interest
    c. Conflict
    d. Timelines

6. Captions (as distinct from subtitles) usually include [A / CO2]
    a. Only translated dialogue
    b. Verbatim transcription, speaker IDs
    c. Only music cues with no dialogue
    d. Lip-synchronisation metadata
7. "The translator is not duplicating the original but reinventing it for a new sensory system" refers to [U / CO3]
    a. Literal translation
    b. Free translation
    c. Intersemiotic translation
    d. Imitation
8. A summary lead is most appropriate for [U / CO1]
    a. Soft feature stories
    b. Hard news with immediacy
    c. Personal profiles and long reads
    d. Satirical pieces
9. Which role focuses on final linguistic accuracy, lip synchrony and audio quality before release? [U / CO2]
    a. Voice actor
    b. Translator/adaptor
    c. QC reviewer / Language supervisor
    d. Casting coordinator
10. Which of the following is a likely risk when using AI to generate AD? [A / CO4]
    a. Faster turnaround for AD scripts
    b. Lack of nuance and cultural sensitivity
    c. Improved multilingual coverage
    d. Reduced need for any human oversight

(1 X 10 = Marks)

Part B

Answer any six questions in about 100 words. Each question carries 5 marks

11. Differentiate Hard News from Soft News substantiating with examples. [U / CO1]
12. Explain Multimodality in Translation [U / CO1]
13. How does Fansubbing support intelligence? [U / CO2]
14. What is Auteur Dubbing? [U / CO2]
15. Define Audio-visual Translation in your own words [U / CO2]
16. Write a note on Intersemiotic Translation [U / CO3]
17. Describe the cinematic Adaptation of the Arrogance of Woltz [A / CO3]
18. Compare Audio Commentary with Audio Description [A / CO4]
19. Discuss the future of Audio Description [U / CO4]

(6 X 5 = 30 Marks)

Part C

Answer any two of the following questions in about 300 words.

20. Explain the role of an Audio Describer in the entertainment industry today. [A / CO4]
21. Introduce the modern trends in dubbing and subtitling that is changing film as an industry. [A / CO2]
22. Explain adaptation as translation with reference to any cinema that is a recreation of a literary work. [A / CO3]
23. You are a journalist based in Thiruvananthapuram who is in charge of translating news material received from news agencies. An International News Agency has supplied a report on the recently held climate summit. Translate and adapt the story for publication in a daily that you are working in (An English National Daily published from Thiruvananthapuram).

    Title: World Leaders Clash over Climate Commitments at Arctic Summit

    Date: November 5, 2025

    Agency: Global News Network (GNN)

    TROMSO, NORWAY – The annual Arctic Climate Summit, hosted this year under the Norwegian chairmanship of the Nordic Council of Ministers, concluded on Thursday amid sharp divisions between major world powers over emission targets and funding commitments for developing nations.

    The summit took place inside the Fram Centre, a research hub named after the historic polar vessel Fram used by explorer Fridtjof Nansen in the 1890s — a symbol that Norwegian organizers said “connects climate science with human endurance.”

    Over 60 countries participated, including members of the Arctic Council – the intergovernmental forum comprising nations such as Norway, Denmark, Iceland, Finland, Sweden, Canada, Russia, and the United States – as well as observer states from the European Union and Asia.

    Debates were dominated by the alarming findings from the AMAP (Arctic Monitoring and Assessment Programme), which reported that Arctic temperatures have risen by an average of 3.7°C since pre-industrial times — nearly four times the global average. Scientists warned that the melting of permafrost could release trapped methane, a potent greenhouse gas, accelerating global warming.

    While the European Union and Canada pledged to phase out diesel-powered transport in the Arctic and expand carbon-trading mechanisms under the Paris Agreement, the United States and China remained divided over the proposed 2035 coal phase-out deadline.

    Developing nations from Asia and Africa, represented by the G77 bloc and led by India, argued that historical emitters must take the lead in financing climate adaptation. The Indian delegation referenced the Green Climate Fund and reminded developed countries of their “unfulfilled $100-billion annual commitment,” first made at the Copenhagen Summit (COP15).

Delegates also debated the inclusion of Indigenous Arctic communities in future decision-making. Representatives of the Sámi Parliament of Norway spoke about rising sea levels threatening reindeer migration routes, while youth activists from Iceland staged a silent protest holding melting ice blocks with the words “No More Promises.”

Despite the intense overnight talks, a Tromsø Declaration was finally adopted, reaffirming the 1.5°C target set by the Paris Accord (2015). However, environmental groups such as Greenpeace Nordic and Extinction Rebellion Arctic called it a “symbolic gesture” lacking binding commitments or enforcement mechanisms.

The final communiqué noted that “the Arctic crisis is a planetary crisis,” urging nations to act before the 2026 Reykjavik Review Conference. [A / CO1]
