MAHATMA GANDHI UNIVERSITY, KOTTAYAM

MGU-UGP (HONOURS) REGULAR EXAMINATION, MARCH 2026

FOURTH SEMESTER

Skill Enhancement Course (SEC)

MG4SECFSQ201 – FIRST AID, FIRE SAFETY, AND DISASTER MANAGEMENT

(2024 ADMISSION ONWARDS)

Duration: 1.5 Hrs **Maximum Marks: 50**

Remember(K), Understand(U), Apply(A), Analyse (An), Evaluate(E), Create(C), Skill(S), Interest(I) and Appreciation (Ap)

Students should attempt at least one question from each course outcome to enhance their overall outcome attainability.

Part A

Multiple Choice Questions
Answer all questions
Each question carries **1** mark

1. A physical phenomenon that poses a threat to the people, structures or economic assets and which may cause a disaster, is the definition for. [K]/[CO1]
   a) Hazard
   b) Disaster
   c) Vulnerability
   d) Risk

2. Identify which of the following is a human made hazard. [K]/[CO1]
   a) Earthquake
   b) Cyclone
   c) Bomb Blast
   d) All of these

3. Vulnerability is one side of a coin; the other side representing the resources people have to resist, cope with, or recover from a hazard, is known as. [U]/[CO1]
   a) Hazard
   b) Disaster
   c) Vulnerability
   d) Capacity

4. Any sustained effort undertaken to reduce a hazard risk through the reduction of the likelihood and/or the consequence component of that hazard's risk, is the definition for.

   [K]/[CO1]

a) Mitigation
b) Preparedness
c) Response
d) Recovery

5. Identify a non-structural mitigation method. [U]/[CO1]
   a) Relocation
   b) Community awareness and education programmes
   c) Detection systems
   d) Resistance Construction

6. Identify the year in which the Disaster Management Act was enacted. [U]/[CO1]
   a) 2004
   b) 2005
   c) 2010
   d) None of these

7. Identify the full form for NDRF. [K]/[CO1]
   a) National Disaster Reactive Force
   b) National Disaster Rehabilitation Force
   c) National Disaster Regulatory Forum
   d) National Disaster Response Force

8. Give the primary objectives of first aid [U]/[CO2]
   a) To provide professional medical treatment and long-term care.
   b) To preserve life, prevent further harm, and promote recovery.
   c) To diagnose the cause of an illness and prescribe medication.
   d) To transport the victim to the hospital as quickly as possible without stabilization.

9. Identify the acronym used to remember the sudden symptoms of a stroke. [U]/[CO2]
   a) DRS ABCD
   b) RICE
   c) BE-FAST
   d) CPR

10. Identify the correct meaning for universal precautions. [U]/[CO2]
    a) Using high-tech equipment for all first aid procedures.
    b) Only treating patients who are known to be infectious.
    c) A risk management strategy to reduce contact with blood and body substances by treating everyone as if they are infectious.
    d) The mandatory use of a first aid kit in every household.

11. While performing CPR on an adult, identify the recommended ratio of compressions to breaths. [U]/[CO2]
    a) 15 compressions followed by 1 breath.
    b) 30 compressions followed by 2 breaths.

c) 50 compressions followed by 5 breaths.
d) 100 compressions with no breaths.

12. Give the technique used to open the airway of an unresponsive adult or child. [K]/[CO2]

a) Finger sweep
b) Abdominal thrusts
c) Head-tilt, chin-lift
d) Chest thrusts

13. Give the recommended depth of chest compressions for an adult during CPR. [K]/[CO2]

a) Approximately 2 cm.
b) Approximately 4 cm.
c) Approximately one-third the depth of the chest.
d) Exactly 10 cm.

14. For a conscious adult who is experiencing a severe airway obstruction (ineffective cough), give the first step a rescuer should take? [U]/[CO2]

a) Perform five chest thrusts.
b) Perform up to five sharp back blows between the shoulder blades.
c) Induce vomiting immediately.
d) Start CPR.

15. Identify which among the following is a symptom of a heart attack that is more common in women than in men? [U]/[CO2]

a) Persistent chest pain or pressure.
b) Shortness of breath, nausea, or unexplained fatigue.
c) Severe bleeding.
d) High fever.

16. Identify which among the following is not a component of fire triangle. [K]/[CO3]

a) Fuel
b) Carbon Dioxide
c) Heat
d) Oxygen

17. Fires involving solid combustible materials of organic nature such as wood, paper, rubber, plastics, etc. belongs to which class of fire. [K]/[CO3]

a) Class A
b) Class B
c) Class C
d) Class D

18. Identify the elements of fire safety programmes. [U]/[CO3]

a) Prevention
b) Detection
c) Extinguishment
d) All of these

19. Identify the acronym used to operate a fire extinguisher. [K]/[CO3]

a) BASS
b) PASS
c) SASP
d) GASS

20. A fire safety device, which is a sheet of a fire-retardant material which is placed over a fire in order to extinguish it is known as. [U]/[CO3]

a) Fire Sprinklers
b) Deluge Systems
c) Fire Blanket
d) None of these

[1 X 20 = 20]

Part B

Short Answer
Answer any **5** questions
Each question carries **4** marks

21. Discuss on the relationship between hazard, vulnerability and disaster. [U]/[CO1]
22. Describe on Disaster Management Act 2005. [U]/[CO1]
23. Describe the "Head-tilt, chin-lift" technique for adults and explain how the procedure differs for infants. [U]/[CO2]
24. Discuss on Cardiopulmonary Resuscitation (CPR). [U]/[CO2]
25. Define fire and discuss on fire triangle. [U]/[CO3]
26. Describe on water type fire extinguishers. [U]/[CO3]
27. Explain the uses and applications of fire blanket. [U]/[CO3]

[4 X 5 = 20]

Part C

Long Essay
Answer any **1** question
Each question carries **10** marks

28. Explain on structural and non-structural mitigation measures in disaster management. [U]/[CO2]
29. Write on the types and features of fire extinguishers. [A]/[CO3]

[10 X 1 = 10]
