MAHATMA GANDHI UNIVERSITY
BCA (HONOURS) FIFTH SEMESTER PRACTICAL EXAMINATION
(2024 ADMISSION ONWARDS)
MG5DSEBCA301 **-Time Series Analysis**

Duration of the Examination: 1.5 Hrs Maximum Marks: 35

Creating Various Types of Charts in Tableau Question:

Using the dataset **Sales_Charts_Data.xlsx**, construct the following six standard visualization charts in Tableau: Bar Chart, Continuous Line Chart (Time Series), Pie Chart (with Percent of Total calculation), Scatter Plot, Treemap, and Dual-Axis Chart.

Input Dataset: Sales_Charts_Data.xlsx

Order_ID	Order_Date	Region	Sales	Profit
ORD-01	2025-01-15	South	12000	2500
ORD-02	2025-02-10	North	45000	8100
ORD-03	2025-03-05	East	18000	3200
ORD-04	2025-04-18	West	54000	9800
ORD-05	2025-05-22	South	28000	4600
ORD-06	2025-06-12	North	32000	-1500
ORD-07	2025-07-20	East	61000	11000
ORD-08	2025-08-14	West	42000	7400

Expected Output:

- **Bar Chart:** Sorted regional sales comparisons colored by profit.
- **Line Chart:** Continuous monthly time-series sales progression.
- **Pie Chart:** Regional sales contribution displayed with percentage share labels.
- **Scatter Plot:** Sales versus Profit correlation plot with disaggregated Order ID points.
- **Treemap:** Hierarchical nested rectangles sized by Sales and colored by Profit.
- **Dual-Axis Chart:** Combined Bar (Sales) and Line (Profit) chart sharing a synchronized timeline.
