MAHATMA GANDHI UNIVERSITY, KOTTAYAM

MGU-UGP (HONOURS)

FOURTH SEMESTER EXAMINATION

(2024 ADMISSION ONWARDS)

MG5DSECND300 – COMMUNITY NUTRITION

Duration: 2 hrs Maximum Marks: 70

Students should attempt at least one question from each course outcome to enhance their overall outcome attainability.

Each question is tagged with the appropriate Bloom's Revised Taxonomy level (Remembering, Understanding, Applying, Analyzing, Evaluating, and Creating.) and the relevant course outcome (CO) number.

* Remember (K), Understand (U), Apply (A), Analyse (An), Evaluate (E), Create (C), Skill (S).

Part A

Objective Questions

Answer **All** Questions

Each question carries **1** mark

1. Infection can reduce nutritional intake mainly by causing: [U][1]
   a) Increased appetite b) Loss of appetite c) Increased food availability d) Improved digestion
2. The vicious cycle may begin with: [U] [1]
   a) Adequate dietary intake b) Inadequate dietary intake c) Balanced nutrition d) Improved immunity.
3. In infants below two years, body weight is commonly measured using:
   a) Stadiometer b) Skinfold calliper c) Salter scale d) Sphygmomanometer
4. The ocular manifestations of vitamin A deficiency are collectively called: [U] [2]
   a) Xeroderma b) Xerophthalmia c) Keratitis d) Conjunctivitis
5. Iron absorption is enhanced by: [U] [2]
   a) Vitamin C b) Tannins c) Phytates d) Tea
6. Cytological examination can show changes related to: [U] [3]
   a) Vitamin A deficiency b) Height c) BMI d) Food expenditure
7. The Food Frequency Questionnaire is mainly used to assess: [K] [3]
   a) Blood nutrient levels b) Long-term dietary patterns c) Body composition d) Clinical signs
8. Which of the following is an indirect indicator of nutritional status? [U] [3]
   a) BMI b) MUAC c) Mortality rate d) Serum albumin.
9. _____ is defined as “any combination of educational strategies, accompanied by environmental supports, designed to facilitate voluntary adoption of food choices and other food and nutrition-related behaviours conducive to health and well-being.

[1 x 10 = 10 marks]

Part B

Short Answer Type Questions

Answer any **5** Questions

Each question carries **2** marks

11. State two effects of malnutrition on the immune system. [K] [3]
12. Explain the concept of ecology of malnutrition. [A] [4]
13. Discuss the two uses of radiological methods [U] [3]
14. Write a note on food weighment method. [A] [3]
15. Define Infant Mortality Rate and toddler mortality rate. [K][1]
16. List out the advantages of individual method. [K][4]
17. Discuss on symposium. [K][4]

[2 x 5 = 10 marks]

Part C

Short Essay Type Questions

Answer **6** Questions

Each question carries **5** marks

18. Explain the effects of malnutrition on the immune system and explain the vicious cycle of infection and malnutrition [A] [1]
19. Explain the spectrum of Protein Energy Malnutrition. [U] [2]
20. Explain the different ocular manifestations of vitamin A deficiency[A] [2]
21. Describe the procedure for measuring body weight in infants and adults. [U] [3]
22. Explain the clinical features of kwashiorkor and marasmus. [U] [3]
23. Explain the consumption expenditure survey with its procedure, advantages and limitations. [A] [1]
24. Write a note on individual method. [A] [4]
25. Explain the importance of nutrition education. [U] [4]

[5 x 6 =30 marks]

Part D

Essay Type Questions

Answer **2** Questions

Each question carries **10** marks

26. Interpret the various causes of IDA under dietary, physiological, infectious, socioeconomic and reproductive factors. [A] [2]
27. Discuss the assessment of nutritional status in adults using BMI, WHR and Broca's Index. [U] [3]
28. Explain the indirect methods, advantages and disadvantages. [A] [3]
29. Explain the stages of nutrition education. [U] [4]

[10 x 2 =20 marks]
