QPCode **Reg.No : .....**

Name : .....

MAHATMA GANDHI UNIVERSITY, KOTTAYAM
MGU-UGP (HONOURS) REGULAR EXAMINATION OCTOBER 2026
Semester V
DSE – MG5DSEZGY301,MG5DSEZIM301 - WILDLIFE MANAGEMET

(2024 ADMISSION ONWARDS)

Duration: 2 hours **Maximum Marks: 70**

Remember(K), Understand(U), Apply(A), Analyse(An), Evaluate(E), Create(C), Skill(S), Interest(I) and Appreciation(Ap)

Students should attempt at least one question from each course outcome to enhance their overall outcome attainability.

Part A

MCQ

Answer all questions

Each question carries **1** marks

1. The gradual and orderly change in the composition of a forest community over time is called [Understand] / [CO1]
   a) Stratification b) Forest succession c) Zonation d)Migration

2. Which of the following indices is commonly used to measure species diversity? [Remember] / [CO 1]
   a) Shannon–Wiener index b) Canopy index c) Leaf area index d) Basal area index

3. Which of the following is a characteristic feature used in the classification of forests? [Remember] / [CO1]
   a) Vegetation type b) Animal behavior c) Soil organisms only d) Wildlife population only

4. The scientific name of the bonnet macaque is [Understand] / [CO 2]
   a) *Macaca mulatta* b) *Macaca radiate* c) *Macaca fascicularis* d) *Macaca nemestrina*

5. The tiger and leopard belong to the order [Remember] / [CO 2]
   a) Primates b) Carnivora c) Proboscidea d) Artiodactyla

6. Project Elephant was initiated primarily for the conservation of [Understand] / [CO 3]
   a) Tigers b) Elephants c) Crocodiles d) Rhinoceroses

7. Which of the following is an example of in-situ conservation? [Understand] / [CO 3]
   a) Zoo b) National Park c) Aquarium d) Captive breeding centre

8. CITES mainly regulates [Remember] / [CO 3]
   a) International trade in wildlife species b) Forest succession c) Remote sensing activities d) Forest volume estimation

9. A remote sensing system that uses its own source of electromagnetic energy is called [Understand] / [CO 4]
   a) Passive remote sensing b) Active remote sensing c) Aerial photography d) Visual observation

10. GPS is primarily used for determining [Understand] / [CO 4]
    a) Geographic position b) Species richness c) Tree volume d) Forest succession

[1x10 = 10]

Part B

Short Answer Questions

Answer any **10** questions

Each question carries **3** marks

11. Explain the structure and functioning of a forest ecosystem. [Understand] / [CO1]

12. Explain forest succession and mention its major stages. [Understand] / [CO1]

13. Explain the significance of Shannon–Wiener and Simpson diversity indices. [Remember] / [CO1]

14. Explain the important biological characteristics of the bonnet macaque (*Macaca radiata*). [Understand] / [CO2]

15. Describe the major ecological adaptations of elephants. [Understand] / [CO2]

16. Explain the ecological roles of tiger and leopard as large carnivores. [Understand] / [CO2]

17. Explain the major causes of human–elephant conflict. [Understand] / [CO3]

18. Explain the difference between in-situ and ex-situ conservation with examples. [Understand] / [CO3]

19. What are the major threats faced by wildlife? Explain any three. [Understand] / [CO3]

20. Define remote sensing and explain its fundamental principle. [Understand] / [CO4]

21. Differentiate between active and passive remote sensing based on the source of energy. [Understand] / [CO4]

22. Explain the applications of GIS, GPS and radio collaring in wildlife studies. [Understand] / [CO4]

[3x10 = 30]

Part C

Short Essay Questions

Answer any **6** questions

Each question carries **5** marks

23. Explain the different types of forests with reference to their classification, distribution, composition and structure. [Remember] / [CO1]

24. Explain the concept of biodiversity hotspots and discuss the significance of the Western Ghats as a biodiversity hotspot. [Understand] / [CO1]

25. Describe the biology, ecology and behaviour of the bonnet macaque (*Macaca radiata*). [Understand] / [CO2]

26. Explain the biology and ecological significance of elephants, tiger and leopard. [Understand] / [CO4]

27. Discuss human–wildlife conflict with reference to elephant and bonnet macaque. Explain the major causes, impacts and suitable mitigation measures. [Understand] / [CO3]

28. Explain the management of protected areas. Discuss National Parks, Wildlife Sanctuaries, Tiger Reserves, Biosphere Reserves, Community Reserves and Ramsar Sites. [Understand] / [CO3]

29. Explain the fundamental principles and major stages of remote sensing. Discuss its classification based on energy source and platform. [Understand] / [CO4]

30. Explain aerial and space remote sensing. Discuss the major merits, limitations and recent developments of remote sensing, with applications in forest and wildlife management. [Understand] / [CO4]

[5x6 = 30]
